## JASPER — LAKE LOUISE HIGHWAY

### ALBERTA — CANADA

At the Top of the World, in the heart of the Canadian Rockies, Jasper Park stands out pre-eminently as one of Canada's greatest wonderlands. Its area of 5380 square miles comprises a region larger than some European Kingdoms. Its boundaries extend roughly from the foothills on the East, to the Great Divide on the West, and from the Northern limits of Banff National Park on the South, to the 43rd parallel on the North.

Jasper Park is a region of superb mountain grandeur, where the mystic peaks of towering mountains, snow-kissed and cloud-tipped, hooded at times in mist and at others bathed in the ethereal glow of a Northern sun, hold one spell-bound before its magic beauty, as long winding trails and auto roads new vistas endlessly break open the enraptured gaze.

Jasper, the administrative centre of Jasper Park, has a charm compounded of many elements. The beauty of its setting, cradled as it is in a girdle of glorious mountains creating a fairy land of valleys, lakes and streams is unequalled. Here out of the profuse hand of the Master artisan exists a veritable Paradise for those seeking recreation, sight-seeing or sport.

Radiating out from Jasper, superb Motor Roads, and pony trails lead the visitor into new worlds that constantly open up before him, where Nature, gracious ever in her endowment, discovers new avenues of knowledge and delight constantly.

The now famous Auto Road from Jasper to Lake Louise, 147 miles in length, of which 65 miles is in Jasper Park and the balance in Banff National Park, affords a wonder trip that will live forever in memory's treasure chest, passing as it does through regions of incomparable beauty. On this trip the Columbia Ice Field Region is penetrated. This great sea of ice and snow, made up of the climax of the accumulation of the snow and ice deposits of the Rockies, has been called "The Mother of Rivers." Here at the geological centre of the water system of one quarter of the continent, issue streams, which take their way finally to three oceans, and carry life and fertility to thousands of miles of valleys and plains.

Nature certainly plays its part in making Jasper Park one of the most beautiful wonderlands in the world, and the National Park authorities have done their part also in making accessible thousands of beauty spots by their wonderful systems of auto roads. The Jasper—Lake Louise—Banff Highway stands supreme as one of the most spectacular highway routes in Canada. In fact, the entire route from Jasper to Lake Louise and Banff is one of the most thrilling sight-seeing routes on the Continent. Throughout its entire length there is not a mile of road but opens up new vistas, in mysteriously beautiful valleys, grand mountains with peaks cloud-kissed and glacier-tipped, sparkling rivers, and lakes of myriad hues mirroring into their lovely surfaces all the wonders of clouds, slopes and mountain heights, staggering snow fields and ice areas and sunset pine clad slopes, unspoiled and untouched by the hand of men. On every hand along this glorious Inter-Park Highway Route Nature has her gifts to bestow in a superlative way—Along this route every mountain thrill and experience may be found—and all, too soon, the journey's end will bring an infinite regret at having to depart from the Land, where for a time Paradise has been regained up at the Top of the World in this beautiful mountain world so generously opened up by the Government of Canada.

A land of Romance and adventure has been reached and all its joys, and thrills obtained. All that is left is the Memory of the golden days spent on the joyous trip from Jasper to Banff along this Highway. The Souvenir Views of this trip will afford many happy moments later on when out of the Casket of Memory they recall the glorious days spent on the Auto Highways of Jasper Park.
